

FRED A. BROWN, JR. ASSISTANT COACH

A native of Palm Beach County, Fred Brown, Jr graduated from Palm Beach Gardens High School. Fred is no stranger to the game of basketball. This extension of the game is a passionate choice for him, assuring kids have an outlet to excel, compete, learn the principals of teamwork and involvement in their community. Coaching is a principal of this, which makes his involvement the true prize.

During his senior year, Fred excelled above the rim being named Palm Beach County's Player of the

Year. While attending Labette Community College, he became the college's #2 All-Time Leading Scorer finishing just eight points shy of becoming the school's all-time scoring leader. He earned N.J.C.A.A. All-American honors during his tenure at LCC and later he transferred to Iowa State University. There he obtained his Bachelor's Degree in Liberal Studies.

In November 2003, Fred began Brown & Brown Real Estate, Inc. While in business, Fred consistently showed the ability to satisfy clients in buying and selling their homes. Fred consistently retained a loyal repeat of clients, a prime reason his business was so successful for nearly 5-years, until the Real Estate Market took a downward spiral, now known as the "housing bust".

Fred has always had a love for amazing sceneries, and enjoys taking pictures. This love ignited a passion that turned his attention to drones and their ability to capture what the human eye cannot with ease. Learning how to utilize and fly drones, the advantage of taking pictures from multiple viewpoints and the love of gadgets has turned this into not only a hobby but a business. Fred has traveled throughout the East Coast of Florida taking countless aerial photos. The endless possibilities that are available with taking pictures using drones, utilizing drones for the benefit of using drones in emergency and disaster situations, encouraged him to launch, "Aerial View Perceptions, LLC", still in business to-date.

Fred has always had a strong determination to be successful in business. Fred is a Licensed Insurance Adjuster in the State of Florida. In addition, he took a leap of faith and left his job with the Palm Beach County School System to become a full-time driver for Uber Technologies. Since then, Fred has established his own private client transportation company that has withstood the test of time during the pandemic and beyond as the nation still struggles throughout the country with business consistency. Fred's company "Brown's Exclusive Car Service" provides specialty, private transportation services to a list of personal clients. This venture has developed great client relationships and personal friendships. The goal is to build the same trusting coaching relationship with your families.
